

Clinical Policy 9.2 MRI Safety

During the second year of clinical practice, students may choose specialty areas for additional clinical rotations and must complete the “Day in a Life” assignments in advanced modalities and other disciplines. It is the responsibility of the program’s clinical instructor to provide appropriate occupational and patient safety training for any student who may enter Zone II of an MRI department.

Because of the possibilities for any student to render aid in and around an MRI department, all students will be required to complete the MRI Screening Protocol Checklist prior to entering the clinical phase of the program. Completion of checklist will ensure that no contraindications exist which would put the student at risk while in the magnetic environment.
