

COLLISION

REPAIR TECHNOLOGY AT TECH

Accidents happen. You can fix them.

Take pride in learning skills to weld, construct materials, paint & rebuild cars, and take them from crushed metal to new. You'll learn specialization areas including being a service writer, parts manager, painter, frame repair specialist, diagnostic technician, repair tech, production manager, fabricator, business manager and shop owner. After completing the program, graduates can earn Automotive Service Excellence credentials that give them a competitive edge in this field that is actively hiring new employees.

What You'll Learn

- Gain hands-on experience using the tools, equipment and technology of the trade.
- Understand and apply the foundational skills needed for a career in collision repair.
- Acquire skills to analyze the damage and provide project estimates.
- Apply skills on real projects in the program's fully operational repair shop.
- Earn an income from shops that pay for skilled techs.

The program meets daily from 7:50 – 10:40 a.m.
Space is limited. Call 405.377.3333 to enroll.
